

# 新一代145kV 车载式移动变电站

New Generation 145kV Mobile Substation

- 集成最新设计的HGIS、主变及智能保护系统等设备，占地面积小，现场快速投运。
- 采用基于IEC61850标准，一次设备和智能终端技术集成的智能化变电站技术，实现高度互动和自动化。
- 全气候条件作业，并具有高扩展性。
- 免（少）维护。

- Integrated equipment with different voltage levels, including the new generation HGIS, power transformer, protection system, and middle or low voltage switchgear, Small footprint, rapid on-site delivery.
- Intelligent substation technology according to IEC61850, primary equipment and intelligent terminal technology integrated for high interaction and automation.
- Suitable for various climatic conditions, and with high flexibility.
- Free (Less) Maintenance.
